

Availability

We only sell trees that are listed in this price list.

The availability of certain tree sizes may be limited.

A few of the tree species and sizes are not for sale at this time as we must give these trees time to grow. It takes 6 to 15 years for the trees in our nursery to reach our saleable size.

All the trees in this price list require equipment to handle the trees as rootballs will weigh from 1500 lbs (680kg) up to 10,000 lbs (4500kg) so we do not plant trees in backyards unless we are able to access the backyard with our truck spades.

Truck and tree spade access limitations:

- Most trees can be planted in Spring, Summer and Fall.
- All our trucks are 8' 6" wide.
- 42" truck mounted tree spade requires minimum width of 10' for access clearance. 12' if driving between houses. Digs evergreen trees up to 10' high.
- 65" truck mounted tree spade requires minimum width of 12' for access clearance. 15' if driving between houses. Digs shade trees up to 5.5" trunk diameter & evergreen trees up 15' high.
- 90" truck mounted tree spade requires minimum width of 12' for access clearance. 20' if driving between houses. Digs shade trees up to 9" trunk diameter & evergreen trees up 25' high.

- **Add an additional 4% per km to planting charges when beyond the 15km radius of our tree farm (Stouffville). Tree price does not change.**
- **High fuel costs. We will be adding a fuel surcharge if fuel price stays above \$1.30 per litre for any tree planting beyond the 15km radius of our tree farm. This could add \$10 to \$30 per tree depending on travel distance and fuel costs at the time of planting.**

- Planting charges include topdressing trees using triple mix, mulch and staking when necessary.

Warranty Terms

All trees purchased and installed by Stevens Large Trees Sales are guaranteed for 2 years from date of invoice. Additional charges may be required if conditions have changed from original installation (e.g. access due to fences, buildings and other obstructions). In no case shall Stevens Large Tree Sales be liable for the loss or damage to trees caused by wind storm, hail, lightning, fire, lack of water, excessive water, road salt damage, contaminated soil, vandalism, or malicious acts. Warranty is void when surrounding grade level is raised higher than the level that the tree was planted.
